

- Color: I picked two main colors for this timeline, blue and green. I chose them as a set of analogous colors and just cuz I like blue a lot!!
- Typography: The main typeface for this project is "Jaro" because I felt like it went well with the "technology" feeling the timeline gives.
- Image treatment: I LOVE interstellar!!! That is why I chose a poster from interstellar as the background image (Also because it fits the theme of blue). I also tinted it a little so it looks nicer.
- Interaction style: I chose the title and the tagline to stay still because, without it, the timeline would look kinda empty. I made the hover states of the buttons flip the icon which kind of looks cool.
- I also specifically made some things less noticeable as I didn't give my audience much attention to those things.
- I also used serif typefaces to write my descriptions so that it will be easier to read.
- I also used contrast to draw attention of the audience to a specific side of a thing.
